For each skill, select the level that best describes your current ability. Hover over each level for a description.

Capabilities vs limitations (hallucinations)

AI Literacy & Foundations | Critical

Target **Level 2**

Understanding AI limitations is crucial for ensuring content accuracy. The learner's background in AI governance provides some foundation, but technical understanding of AI's capabilities and limitations is a gap.

0 Unaware | 1 Aware | 2 User | 3 Practitioner | 4 Builder

Your level: 2 — User (Meets target)

Prompt debugging & iteration

Prompting & HITL Workflows

Target **Level 3**

While the learner has experience with AI tools, they lack technical skills in prompt debugging and iteration, which are essential for refining content generation algorithms.

0 Unaware | 1 Aware | 2 User | 3 Practitioner | 4 Builder

Your level: 2 — User (Gap: 1 level)

Eval types (offline/online/red team)

Evaluation & Observability

Target

The learner's experience in data analysis is limited, making this skill important for evaluating content performance and effectiveness, which is a key part of the role.

Level 2

0 Unaware | 1 Aware | 2 User | 3 Practitioner | 4 Builder

Your level: 1 — Aware (Gap: 1 level)

AI-generated content disclosure

Governance & Compliance

Target Level 2

The learner has some exposure to AI governance, but understanding disclosure requirements for AI-generated content is a new area that aligns with their interest in ethical AI implementation.

0 Unaware | 1 Aware | 2 User | 3 Practitioner | 4 Builder

Your level: 2 — User (Meets target)

Draft -> critique -> revise

Prompting & HITL Workflows | Critical

Target Level 3

The JD emphasizes 'editing and optimizing content' and 'developing new content ideas', which requires iterative refinement of AI-generated content.

0 Unaware | 1 Aware | 2 User | 3 Practitioner | 4 Builder

Your level: 2 — User (Gap: 1 level)
