Capabilities vs limitations (hallucinations)

AI Literacy & Foundations | Critical

Target **Level 2**

Understanding AI limitations is crucial for ensuring content accuracy. The learner has some exposure to AI governance, but technical understanding of AI's limitations is a gap.

0 Unaware | 1 Aware | 2 User | 3 Practitioner | 4 Builder

Prompt debugging & iteration

Prompting & HITL Workflows

Target **Level 3**

While the learner has experience with AI tools, debugging and iterating prompts for optimal AI output is a new skill that will enhance their content creation capabilities.

0 Unaware | 1 Aware | 2 User | 3 Practitioner | 4 Builder

Recognizing AI-generated content

Critical Thinking & Info Eval | Critical

Target **Level 2**

The learner's experience in evaluating content can be leveraged, but recognizing AI-generated nuances is a new area that will be critical for the role.

0 Unaware | 1 Aware | 2 User | 3 Practitioner | 4 Builder

AI-generated content disclosure

Governance & Compliance

Target
Level 2

The learner's background in AI governance provides a foundation, but specific disclosure practices for AI-generated content are a new area to develop.

0 Unaware | 1 Aware | 2 User | 3 Practitioner | 4 Builder

Draft -> critique -> revise

Prompting & HITL Workflows | Critical

Target
Level 3

The JD emphasizes 'editing and optimizing content' and 'developing new content ideas', which requires iterative refinement of AI-generated content.

0 Unaware | 1 Aware | 2 User | 3 Practitioner | 4 Builder
