Top 5 Skills for the Targeted Role

We identified 8 key skills from the job description. Targeted role: **AI Content Editor**. Please rate your current proficiency for each skill.

#2 **Capabilities vs limitations (hallucinations)** AI Literacy & Foundations

Understanding AI limitations is crucial for content accuracy, and the learner's background in ethics provides a moderate foundation to build on.

Target: Level 2

Rate Your Current Proficiency

For each skill, select the level that best describes your current ability. Hover over each level for a description.

Capabilities vs limitations (hallucinations) AI Literacy & Foundations Critical

Target
Level 2

Understanding AI limitations is crucial for content accuracy, and the learner's background in ethics provides a moderate foundation to build on.

0 Unaware | 1 Aware | 2 User | 3 Practitioner | 4 Builder

Your level: 2 — User (Meets target)

#3 **Prompt debugging & iteration** Prompting & HITL Workflows

The learner has no coding experience and limited technical background, making this a critical skill to develop for refining content generation algorithms.

Target: Level 3

Rate Your Current Proficiency

For each skill, select the level that best describes your current ability. Hover over each level for a description.

Prompt debugging & iteration Prompting & HITL Workflows

Target
Level 3

The learner has no coding experience and limited technical background, making this a critical skill to develop for refining content generation algorithms.

0 Unaware | 1 Aware | 2 User | 3 Practitioner | 4 Builder

Your level: 3 — Practitioner (Meets target)

#4 **Eval types (offline/online/red team)** Evaluation & Observability

The learner's experience with data analysis is limited, making this a valuable skill to develop for evaluating content performance.

Target: Level 2

Rate Your Current Proficiency

For each skill, select the level that best describes your current ability. Hover over each level for a description.

Eval types (offline/online/red team) Evaluation & Observability

Target
Level 2

The learner's experience with data analysis is limited, making this a valuable skill to develop for evaluating content performance.

0 Unaware | 1 Aware | 2 User | 3 Practitioner | 4 Builder

Your level: 1 — Aware (Gap: 1 level)

#5 **AI-generated content disclosure** Governance & Compliance

The learner's background in ethics and compliance provides a foundation, but understanding disclosure requirements is a new area to explore.

Target: Level 2

Rate Your Current Proficiency

For each skill, select the level that best describes your current ability. Hover over each level for a description.

AI-generated content disclosure Governance & Compliance

Target
Level 2

The learner's background in ethics and compliance provides a foundation, but understanding disclosure requirements is a new area to explore.

0 Unaware | 1 Aware | 2 User | 3 Practitioner | 4 Builder

Your level: 2 — User (Meets target)

#1 **Draft -> critique -> revise** Prompting & HITL Workflows

The JD emphasizes 'editing and optimizing content' and 'evaluate and edit AI-generated content', which requires iterative refinement skills.

Target: Level 3

Rate Your Current Proficiency

For each skill, select the level that best describes your current ability. Hover over each level for a description.

Draft -> critique -> revise Prompting & HITL Workflows Critical

Target **Level 3**

The JD emphasizes 'editing and optimizing content' and 'evaluate and edit AI-generated content', which requires iterative refinement skills.

0 Unaware | **1** Aware | **2** User | **3** Practitioner | **4** Builder

Your level: 2 — User (Gap: 1 level)

#2 **Cross-functional AI collaboration** Communication & Collaboration

The role involves 'collaborating with AI developers' and 'coordinate with cross-functional teams', necessitating strong collaboration skills.

Target: Level 3

#3 **Recognizing AI-generated content** Critical Thinking & Info Eval

The JD requires 'evaluate and edit AI-generated content', which implies the need to recognize and assess AI-generated outputs.

Target: Level 2

#8 **Model families (open vs closed)** AI Literacy & Foundations

A 'strong understanding of AI technologies' is needed, which includes knowledge of different model families.

Target: Level 2

Since 3 skills match your targeted level, we will proceed with the remaining 2 skills.
