Top 5 Skills for the Targeted Role

We identified 8 key skills from the job description. Targeted role: **AI Content Editor**. Please rate your current proficiency for each skill.

#1 **Draft -> critique -> revise** Prompting & HITL Workflows

While the learner has strong editing skills, integrating AI into the iterative content refinement process is new, making this a high-priority skill to develop.

Target: Level 3

Rate Your Current Proficiency

For each skill, select the level that best describes your current ability. Hover over each level for a description.

Draft -> critique -> revise Prompting & HITL Workflows Critical

Target **Level 3**

While the learner has strong editing skills, integrating AI into the iterative content refinement process is new, making this a high-priority skill to develop.

0 Unaware | 1 Aware | 2 User | 3 Practitioner | 4 Builder

Your level: 2 — User (Gap: 1 level)

#2 **Capabilities vs limitations (hallucinations)** AI Literacy & Foundations

The learner's experience with ethical AI implementation provides some foundation, but understanding technical limitations of AI models is crucial for content accuracy.

Target: Level 2

Rate Your Current Proficiency

For each skill, select the level that best describes your current ability. Hover over each level for a description.

Capabilities vs limitations (hallucinations) AI Literacy & Foundations Critical Target **Level 2**

The learner's experience with ethical AI implementation provides some foundation, but understanding technical limitations of AI models is crucial for content accuracy.

0 Unaware | 1 Aware | 2 User | 3 Practitioner | 4 Builder

Your level: 2 — User (Meets target)

#3 **Recognizing AI-generated content** Critical Thinking & Info Eval

The learner's background in communications supports critical evaluation, but specific skills in recognizing AI-generated nuances are needed for this role.

Target: Level 2

Rate Your Current Proficiency

For each skill, select the level that best describes your current ability. Hover over each level for a description.

Recognizing AI-generated content Critical Thinking & Info Eval Critical Target **Level 2**

The learner's background in communications supports critical evaluation, but specific skills in recognizing AI-generated nuances are needed for this role.

0 Unaware | 1 Aware | 2 User | 3 Practitioner | 4 Builder

Your level: 2 — User (Meets target)

#4 **Prompt debugging & iteration** Prompting & HITL Workflows

The learner has intermediate exposure to AI but lacks experience in technical prompt iteration and debugging, which is crucial for refining content generation algorithms.

Target: Level 3

Rate Your Current Proficiency

For each skill, select the level that best describes your current ability. Hover over each level for a description.

Prompt debugging & iteration Prompting & HITL Workflows

Target **Level 3**

The learner has intermediate exposure to AI but lacks experience in technical prompt iteration and debugging, which is crucial for refining content generation algorithms.

0 Unaware | 1 Aware | 2 User | 3 Practitioner | 4 Builder

Your level: 3 — Practitioner (Meets target)

#5 **AI-generated content disclosure** Governance & Compliance

The learner's experience with ethical AI provides a foundation, but understanding specific disclosure requirements for AI-generated content is a new area to develop.

Target: Level 2

Rate Your Current Proficiency

For each skill, select the level that best describes your current ability. Hover over each level for a description.

AI-generated content disclosure Governance & Compliance

Target **Level 2**

The learner's experience with ethical AI provides a foundation, but understanding specific disclosure requirements for AI-generated content is a new area to develop.

0 Unaware | 1 Aware | 2 User | 3 Practitioner | 4 Builder

Your level: 1 — Aware (Gap: 1 level)

#2 **Cross-functional AI collaboration** Communication & Collaboration

The role involves 'collaborating with AI developers' and 'coordinating with cross-functional teams', necessitating strong collaboration skills.

Target: Level 3

#7 **AI documentation best practices** Communication & Collaboration

Developing 'editorial guidelines and style standards' requires documenting best practices for AI content.

Target: Level 3

#8 **IP/copyright awareness** AI Literacy & Foundations

Creating AI-generated content involves understanding IP risks, as implied by the JD's focus on content creation.

Target: Level 1

Since 3 skills match your targeted level, we will proceed with the remaining 2 skills.
